# Vārna Blade Mechanical Wireless Keyboard

Thank you for choosing **Vārna Blade.** We are confident that it will serve you well for years to come.

The **Vārna Blade** is a compact 65% TKL keyboard with independent keycaps and switches that are hot swappable. With its elegant design, it should be equally at ease at your work desk or with your gaming rig.

As fellow geeks, we understand reading instruction manuals is tedious but please take a moment to read the *Getting started* section to ensure usage of the right connection protocol. This will enable your device to deliver an optimal user experience.

GETTING STARTED

Powering On

1. Please use the supplied cable to charge your keyboard for 3 hours before first use .
2. Use the Power switch next to the charging port to switch on your keyboard .
3. IMPORTANT: Please ensure you have paired device before usage.
4. If your connectivity is not working in future, please check that you are using the correct channel

Pairing and Usage Summary

1. **Channel 1:** Fn + Q: Bluetooth Device 1 (Light Blue LED)
2. **Channel 2:** Fn + W: Bluetooth Device 2 (Purple LED)
